ACS Facilitates Over 30,000 Filled Prescriptions for Uninsured Hurricane Victims

DALLAS, TEXAS: January 26, 2009 – More than 30,000 medical prescriptions were filled for eligible residents affected by hurricanes Gustav and Ike through the Emergency Prescription Assistance Program (EPAP). EPAP is an initiative established by the Centers for Medicare & Medicaid Services (CMS) on behalf of the Federal Emergency Management Agency (FEMA) in which Affiliated Computer Services, Inc. (NYSE: ACS) provides critical program support and cost-saving innovation.

Activated to assist in the response to hurricanes Gustav and Ike, the EPAP streamlined the federal medical response by enabling pharmacies to fill prescriptions and provide qualifying medical equipment at negotiated market rates for those without health insurance living in, or evacuated from, declared federal disaster areas. An ACS solution, the SmartTPL eligibility system, quickly identified individuals' insurance status and those who qualified received assistance from a robust nationwide network of participating pharmacies.

From the EPAP activation for Hurricane Ike in Texas:

- More than 25,000 prescriptions filled
- SmartTPL saved CMS over \$150,000 on claims avoided

From the EPAP activation for Hurricane Gustav in Louisiana:

- More than 6,000 prescriptions filled
- SmartTPL saved CMS over \$12,000 on claims avoided

“With such a large number of prescriptions filled during hurricanes Gustav and Ike, it’s evident that EPAP provided a critical service for people in need of immediate assistance after a natural disaster,” said Tim Conway, senior vice president and managing director of ACS Federal Solutions. “ACS’ partnership with CMS is designed to streamline the process and ensure that people affected by a major disaster don’t have to go without their medication.”

Because the EPAP uses existing channels of how people receive their prescriptions, it is seamless to users and can be instantaneously activated, as was the case with Gustav and Ike. In addition, as part of the EPAP program, ACS provided call center support for hurricane victims and pharmacists.

“The EPAP puts pharmacies on the front lines in a disaster. It’s the most practical and effective way to get needed medicine to citizens,” said Steve Konsin, ACS vice president. “And the efficiencies from using the SmartTPL solution increases speed and saves taxpayers money.”

ACS is the largest provider of business process solutions and one of the largest IT service providers to the nation’s public sector. We serve as an operational partner to more than 1,700 agencies at all levels of government located in every state in the U.S.

The work of ACS touches millions of people every day. Each year, ACS processes more than half of the nation’s child support payments; manages 20 electronic payment card programs for states and the federal government, disbursing government payments and benefits; processes nearly 375 million Medicaid claims totaling more than \$39 billion in payments; handles more than half of the electronic toll transactions in the U.S.; facilitates more than 185 million online searches for unclaimed property; and services student loans for more than ten million borrowers.
