

ACS Healthcare Expert Will Saunders Appointed to Electronic Health Information Exchange Taskforce

DALLAS, May 21 /PRNewswire-FirstCall/ -- Affiliated Computer Services, Inc. (NYSE: ACS) today announced that Will Saunders, ACS' Senior Vice President of Strategy and Product Development, has been appointed to the Health Information Communication and Data Exchange Taskforce of the State Alliance for e-Health.

The State Alliance for e-Health is an executive-level body of state elected officials, including governors, state legislators, insurance commissioners, and attorneys general, working to facilitate quality improvement and efficiency in healthcare through electronic health information exchange (HIE). The taskforce supports the State Alliance on issues regarding the roles for publicly funded health programs in interoperable, electronic HIE.

"Will is uniquely qualified to represent ACS and support the State Alliance for e-Health in this important capacity. He has been instrumental in helping the State of Missouri's Division of Medical Services build an innovative, cutting-edge technology for an electronic health record, a program spearheaded by Missouri Governor Matt Blunt," said Christopher T. Deelsnyder, Senior Vice President and Managing Director, ACS Government Healthcare Solutions.

The Health Information Communication and Data Exchange Taskforce develops policy statements, resolutions, and recommendations for referral to the State Alliance that address ways in which states can enhance Medicaid, State Children's Health Insurance Programs, employee health benefits, and public health through cooperative HIE activities with the private sector. The taskforce's 18 members include senior healthcare executives from both the public and private sectors.

The National Governors Association Center for Best Practices is supporting the work of the State Alliance for e-Health and its taskforces, along with partners such as the National Conference of State Legislators and National Association of Attorneys General.

Saunders has held leadership positions in the information technology and healthcare fields for more than 15 years. He is a graduate of the University of Virginia. He and his family make their home in Virginia.

ACS is a national leader in state healthcare program administration, offering a full spectrum of systems and complementary services through an integrated solution. From care management solutions and child health programs to pharmacy benefits management and traditional Medicaid fiscal agent services, ACS has a proven track record and extensive program management expertise. ACS is also a pioneer in fraud and abuse protection and other cost containment methodologies, and is known for its collaborative approach to client relationships that produce results over the long term. ACS supports more than 20 million program recipients and processes nearly 475 million Medicaid healthcare claims annually, representing close to \$50 billion in provider payments. As the nation's largest government program pharmacy benefits administrator, ACS serves 28 states, the District of Columbia, and the U.S. Department of Labor.

ACS, a global FORTUNE 500 company with 58,000 people supporting client operations reaching more than 100 countries, provides business process outsourcing and information technology solutions to world-class commercial and government clients. The Company's Class A common stock trades on the New York Stock Exchange under the symbol "ACS." ACS makes technology work. Visit ACS on the Internet at <http://www.acs-inc.com>.
